

Manually Activate Microsoft Office on KMS Server

Run these commands in Command Prompt as administrator:

- For Office 2016, 2019, 2022:

```
cd "c:\Program Files\Microsoft Office\Office16"
```

If you are using the 32-bit MS Office version installed on 64-bit Windows, you need to use this command:

```
CD "C:\Program Files (x86)\Microsoft Office\Office16"
```

- Manually specify the KMS server name:

```
cscript ospp.vbs /sethst:<PI-KMS-DNS-NAME>
```

(optionally) You can set the KMS server port number:

```
cscript ospp.vbs /setprt:1688
```

- Activate your Office copy on the KMS server:

```
cscript ospp.vbs /act
```

- Check the Office activation status:

```
cscript ospp.vbs /dstatusall
```
